

Because everyone has the right to protection

We believe that everyone has the right to protect their data and have their data protected. Worldwide, both individuals and businesses across many industries use Galaxkey. With Galaxkey you command the solution, you protect your data, you own your data and you control your data. With white labelling, the solution becomes your own. Galaxkey gives you a level of data governance to follow your data wherever it goes, keep your data where you choose, control access to your data and expire or revoke access on a whim. Galaxkey is a data-centric solution. Whilst applying current data security, encryption and policy all data is properly protected and managed.

Control your data security.
Any data, any place, any time.

Your Data
Own It | Control It | Protect It

Galaxkey is data protection built right

Galaxkey is your all-in-one data protection solution. The Galaxkey platform allows businesses of all sizes to protect any kind of data and keep ownership and control of their data wherever it is. After all, it is your data, so you should have the right to own, control and protect it-always!

Galaxkey helps businesses to easily protect and manage their data on their terms. It works across all platforms, interfaces and environments so that you can continue to work as you choose with no disruption to business process and function. You can continue to use the systems you have confidence in, be it desktop or mobile: Windows, Mac, iOS and Android.

Likewise, Galaxkey makes it straightforward to securely communicate and collaborate with anyone, regardless of their work practices and tools of choice: email, files, Dropbox, Box, OneDrive or iCloud.

Compliance Matters

Your business has legal data protection and compliance responsibilities. Galaxkey gives you the tools and functions that you need to meet them. The Confidentiality, integrity and availability of data is essential to this and Galaxkey helps you fulfil it.

Galaxkey ensures data is confidential

Our compliance consultants have in-depth knowledge of all appropriate corporate governance and risk management requirements. Comsure's team are well versed in the most complex of regulatory issues, so can provide clarity to our clients. Our expert compliance professionals support clients in meeting their regulatory and risk management challenges in a cost-effectively.

Galaxkey ensures data is available

Your data is available on demand. The Galaxkey cloud (private, public and hybrid) and the Geofence function ensures that your data is always available and where you want it. Never lose track of your data.

Galaxkey supports explicit data protection requirements

Data protection regulations (like GDPR) specify explicit data protection requirements. Data must be portable. The right to be forgotten' must be possible. Personally identifiable Information (PII), secured, stored and trackable. Galaxkey helps to fulfil these.

Galaxkey ensures data integrity

Digitally signing data and documents (Anti-spoof) endorses the integrity of your data, no matter where it goes. You can track data access. You have assurance that your data has not been tampered with.

Data goes the distance, so should your protection

Data adapts. Data travels. Data is flexible. Your business requires data protection without restrictions. Galaxkey is both flexible and extensible. It adapts to any type of data, in any environment and across multiple platforms. You can protect and control your data, end-to-end, whilst it traverses the boundaries of your physical environment. Galaxkey does not disrupt infrastructure, IT or end users. No intermediary software or hardware is needed, so Galaxkey fits seamlessly within your existing environment and processes.

Built to stand the test of time

Galaxkey is fully compliant with FIPS 140-2, uses 2048-bit encryption algorithms and uses current technologies. You are assured of lasting data protection and accessibility. Galaxkey is innovative; always staying ahead of the game. Helping you to meet your legal data protection and compliance obligations.

Strong yet simple

Galaxkey do not want complexity to stand in the way of data protection. Too often users choose to side-step security to avoid complicated and inefficient practices. That is why Galaxkey is simple to use. Anyone can use Galaxkey with ease. Secure your data at the click of a button. As easily and efficiently as you secure your data, you and your recipients can view the data too. Secure collaboration is easy with Galaxkey so that you can get your work done as before but now securely. Apply rules and policies to automatically secure on demand. Galaxkey can be up and running in minutes, protecting the data you value.
